# <u>M E M O R A N D U M</u>

**TO:** Audit Committee

THROUGH: Ray Tulloch

FROM: Clifford F. Dobler

**SUBJECT:** Potential charge offs of capitalized costs incurred at the Burnt Cedar Water Disinfection Plant #2299DI1401

STRATEGIC PLAN REFERENCE(S): None

DATE: 6-16-2022

#### I. <u>RECOMMENDATION</u>

Review, discuss and determine if action is necessary to expense costs that may have been incorrectly capitalized. This may also require identification of what level of asset componentization is being applied and too ensure consistency in this application.

#### II. BACKGROUND and ANALYSIS

For the past six years from 7-1-2015 to June 30, 2021, \$548,004 in costs were charged to the Burnt Cedar Water Disinfection Plan capital project #2299DI1401. During that period, several charges for design, IVGID engineering, IVGID work orders, and outside purchases and contracts were included.

It is unclear, if all of the charges were capitalized under one capital assets or were capitalized as individual components of the Disinfection Plant.

#### **Probable Expense Items**

Concept designs were completed by Jacobs Engineering Group, Inc. for a contingency plan to extend water intake line for low levels in Lake Tahoe (\$28,037) and CH2M-Hill provided an evaluation of the SSADA system

(\$21,271). These charges should have been expensed based on Moss Adams recommendations.

IVGID Engineering charges of \$60,000 should have been expensed based on Moss Adams recommendations.

There were 7 internal work orders for \$5,647 which were for labor only and may not have reached the capitalization thresholds. There could be associated purchased items when combined with the labor could have reached the capitalization. A public records request have been made for the work ourders..

LA Perks Plumbing & Heating, Inc. repaired three inlet pumps for \$26,889 which should have been expensed as repairs.

Ferrell Civil Engineering charged \$4,350 for Beach flatscape and Carson Pump LLC, charged \$500. Both charges should have been expensed as the amounts did not meet capitalization thresholds.

Brown & Reed charged \$7,700 to repair the HVAC which should have been expensed.

There was \$35,182 charged by Coldale Electric Supply for Water Pump Station 2.1. Obviously a coding error.

#### Components subject to capitalization as separate items

The vast majority of the remaining costs appear to be for new software and hardware.

#### Exhibits

A. List of Costs from 7-1-2015 to 6-30-2021

B. Project Summary for 2020

### III. BID RESULTS

Not required

### IV. FINANCIAL IMPACT AND BUDGET

Possible prior period adjustment.

### V. <u>ALTERNATIVES</u>

NONE

#### VI. <u>COMMENTS</u>

NONE

### VII. STRATEGIC PLAN REFERENCE(S)

NONE

#### VIII. BUSINESS IMPACT

.Material Weakness in financial statements effecting future financing arrangements.

## EXHIBIT B

# **Project Summary**

Project Number:	2299DI1401
Title:	Burnt Cedar Water Disinfection Plant Improvements
Project Type:	E - Capital Maintenance
Division:	99 - General Administration - Water
Budget Year:	2020
Finance Option:	
Asset Type:	DI - Distribution Infrastructure
Active:	Yes

#### **Project Description**

The Burnt Cedar Water Disinfection Plant produces one billion gallons of potable drinking water for the 8000+ customers in Incline Village and Crystal Bay. The delivery of potable water to our customers is the most important mission of the Public Works Department. The two main federal water regulations that regulate the District's water system is the Surface Water Treatment Rule (SWTR 1989) and the Long Term 2 Enhanced Surface Water Treatment Rule (LT2 2006). The Plant contains raw water pumping, ozone system for disinfection for virus inactivation, ultraviolet system for girardia and cryptospiridium inactivation, chlorine dosing for residual disinfectin in the distribution, and treated water pumping. Associated with these processes are communication equipment, electrical equipment, instrumentation equipment, valving, standby electrical generation, chemical dosing etc. The plant has been in existence since 1961 with the most recent major upgrade completed in 2012 to achieve compliance with LT2.

This project is to cover the on-going capital maintenance and replacement of the equipment and facilities at the water disinfection plant.

#### **Project Internal Staff**

Staff will oversee the design, bid and administer the construction.

#### **Project Justification**

This project is for on-going capital replacement of equipment and facilities at the water disinfection plant. This project also includes a possible extension of the water intake pipeline. EPA and State Regulations may require extension of the raw water intake to the water plant where it is deeper and farther from the shore and creek mouths where it will be less influenced by disturbances from storms. This project also includes the potential abandonment of the old water intake line in Crystal Bay owned by IVGID since 1978. This project funds mechanical, electrical civil and control system improvements.
