P: 775.832.1203 / PW@IVGID.ORG

Holiday Office Closures:

Oct. 27th / Nov. 10th, 23rd & 24th / Dec. 25th

REMEMBER TO WINTERIZE

Monitor the weather for freezing temperatures BEFORE the cold weather sets in to take action in and outside your property and avoid freezing pipes. Pipes that freeze most frequently are those exposed to severe cold, such as outdoor hose bibs, upper floor bathrooms, water sprinkler lines and water supply pipes in unheated interior areas (basements, crawl spaces, attics, garages or kitchen cabinets). Also, pipes that run against exterior walls that have little or no insulation are subject to freezing. Visit <https://www.yourtahoeplace.com/public-works/water/winterization> for winterization tips.

It only takes a few minutes and can save hundreds of dollars in repair costs and water bills. Shut off and drain the irrigation system. Locate the main irrigation valve and drain. Locate your backflow device, and either remove it and store it in a warm area, such as your garage, or cover it with an insulated bag to prevent damage due from freezing temperatures. Turn your irrigation controller to the “off” position. Not every home will have all of these devices and, therefore, your steps may vary. More details at: <https://www.yourtahoeplace.com/public-works/water/winterization>

SHUTTING DOWN IRRIGATION

WE NEED YOU HELP!

Public Works needs every property owner's help to complete a required EPA "Lead and Copper Rule" Service Line Inventory survey. The United States Environmental Protection Agency (EPA) is requiring all water systems in the U.S. to develop complete inventories of water service lines within their jurisdiction. IVGID is required to provide this information to the EPA by October 16, 2024, and we need your help! To complete this survey for your property, please visit: <https://bit.ly/IVGIDPWLeadandCopperSurvey>.
